

MEDIA ADVISORY

Rep. Pete Olson (R-TX) to Keynote Nextgov’s “Healthcare 2030” Forum

Event to explore government’s role in leveraging artificial intelligence and machine learning to shape the future of healthcare

Wednesday, March 13 — 8:00 - 11:00 a.m.
Hotel Monaco, Washington. D.C.

Washington, D.C. (March 7, 2019) — U.S. Representative Pete Olson (R-TX) and leading healthcare tech experts will take the stage at [Nextgov’s Healthcare 2030: The Future of Intelligent Healthcare](#) event on March 13 to discuss the strategies that federal government must develop now to prepare for the digital future of public health.

Nextgov, [Government Executive Media Group](#)’s federal tech-focused media brand, offers insightful policy events and journalism to facilitate greater discourse around the innovations that are transforming the way government agencies support citizens.

Hosted at Hotel Monaco in Washington D.C., the healthcare and tech forum will examine how artificial intelligence-based applications can help optimize the healthcare enterprise, enhance patient care through the integration of robotics, and identify and mitigate public health threats before they emerge. In addition to Congressman Olson, featured speakers include:

- **Dr. Richard Satava**, Professor Emeritus of Surgery, University of Washington Medical Center
- **Dr. Jean Vettel**, Senior Science Lead/Neuroscientist, U.S. Army Research Laboratory
- **Dr. June Lee, Chair**, NIH Artificial Intelligence Interest Group and Clinical Pharmacologist/ Program Director, National Institute of Child Health and Human Development

- **Dr. Don Rucker**, National Coordinator for Health Information Technology, U.S. Department of Health and Human Services
- **Dr. Ryan Vega**, Acting Executive Director, VHA Innovation Ecosystem, U.S. Department Veterans Affairs

The full event agenda and additional details are available here:
